THE BLUE RIBBON LIST ★

U. S. Department of Agriculture
OF THE

WORLDS FINEST DAFFODILS

1948

Listed herein are the finest Daffodils obtainable, note the many awards which are designated by an * following the names. They have been assembled from England, Ireland, Australia and Holland and include some very fine American introductions.

All these varieties are grown at our nurseries in Gloucester and York Counties, Virginia, and are guaranteed true to name. These stocks are carefully inspected, once during the growing season in the spring and again in the fall (just before shipping season) by State Inspectors. The grower of these fine varieties has had many years experience with Daffodils, which includes 20 years as farm manager for one of the largest raisers of Daffodils in this country.

Virginia grown Daffodils bloom two or three weeks earlier than those raised in the cooler Northern climate. Flowering this much earlier they have a chance to develop fully while the weather is still cool. This is especially important with the highly colored reds, oranges and the many delicate shadings that are seldom seen, especially if they open during bright warm spring weather.

As a number of varieties on this list will not be dug unless ordered, it is **IMPORTANT** that orders be sent in before June 30, (digging must be completed in July). If desired, full description will be furnished on any variety ordered.

R.H.S. CLASSIFICATION OF DAFFODILS

1a—Yellow trumpets. 1b—White trumpets. 1c—Bicolor trumpets.
2a—Yellow incomp. 2b—White incomp. 3a—Yellow barri. 3b—White barri.
4a—Giant leedsii. 4b—Medium leedsii. 5—Triandrus. 6—Cyclamineous.
7—Campernels and Jonquils. 8—Poetaz. 9—Poeticus. 10—Doubles. 11—various.

NOTE: The Royal Horticultural Society in London is reclassifying and adding new divisions to take care of the many new developments in daffodils. The new classifications will go into effect January 1, 1949.

CUT FLOWERS FOR SPRING

As usual I am booking orders for my DAFFODIL NOVELTY BOXES which contain a collection of 10 dozen (120) blooms in 10 new and unusual varieties, which are rarely if ever available at florist shops. With over 800 varieties from which to select, those who place orders for boxes at weekly intervals seldom get any duplications. Blooms should be in their prime between March 10-April 25, and the Novelty Boxes are marvelous Easter Presents.

PRICE, including Special Delivery — \$3.50 per box.

To satisfy a growing demand for NAMED collections we will fill orders for Novelty Boxes containing named collections of 20 varieties, 6 blooms of each variety correctly labeled.

PRICE, including Special Delivery — \$4.50 per box.

Collections of single specimen blooms 10 cents each provided order amounts to at least \$5.00. Garden Clubs find these labeled collections useful and instructive at their spring meetings. Delivery of blooms in good shape to any point east of Chicago and no further south than Georgia is guaranteed.

For many years I have been faced with two problems pertaining to daffodils. Satisfactory labels or markers for the many varieties which I grow, and suitable vases or containers for their blooms in the home. Both are now solved and the results are available to you.

LABELS

These had to be inconspicuous, yet permanent and reasonable. They are T shaped with two aluminum legs 12 inches long and a 3 by $\frac{3}{4}$ inch zinc name plate. Which if put on with a weatherproof pencil lasts for 3 years. Ordinary pencil is good for 1 year. The long legs permit them to be raised up during the spring so names are easily seen. After blooming season they can be pushed level with the ground and remain there till the following spring. With these labels there is no reason for anyone losing the identity of their varieties.

PRICE—In dozen lots at \$1.00 per dozen—Postpaid.

VASES

Anyone who has ever tried to arrange daffodil blooms in the ordinary flower container knows how difficult it is to get them in the right position and MAKE them stay put. Last spring in Williamsburg I found an 18th Century vase which is not too tall or too short, nor too wide at the rim or too narrow at the bottom. I have had it copied by one of the famous Potters at Williamsburg. They are shaped by hand on a potters wheel from the famous clays found at Jamestown and Williamsburg and are finished with a hard clear glaze of daffodil green. We are offering them in two sizes. The smaller one will hold from 1 to 3 specimen blooms, while the larger size is ideal for up to a dozen blooms.

PRICE—Small \$.75 each — Large \$1.00 — Postpaid.

PLANTING INSTRUCTIONS FOR DAFFODILS

The main requirement for success is a well drained soil. They are not happy in a wet spot where water will stand. Any good garden soil is ideal. Cow manure mixed in the soil at, or preferably before planting time, is ideal and will produce blooms and bulbs of unbelievable size. Bone meal is the only safe substitute to use at planting time. A top dressing of stable manure is always helpful during the winter months, serving also as a mulch. In the Middle Atlantic states plant bulbs deep enough so the neck of the bulb is covered with 3 or 4 inches of earth after the ground has settled. In the more Northern states 4 to 5 inches is desirable, while in the Southern states 2 or 3 inches is sufficient. Early planting is advisable so that the root system can develop before cold weather sets in. All questions pertaining to daffodils cheerfully answered.
